Blueant ERP

Codebase file guide | Hinglish quick reference

Har file ka purpose 1-2 short lines mein. Includes Sales Manager aur Sales Coordinator refactor files. Prepared: 29 October 2026.

Basic words

Component = UI ka reusable tukda. Hook = state aur logic. API = backend request. Service = shared data/session management. Types = data ka structure. Styles = colors, spacing aur layout. Mock = sample/static data.

Coverage: 164 source files + 15 root files. Dependencies/build output aur android, public, .github jaise folders ki internal files individually cover nahi hain.

src/api

File / folder	Purpose
auth.ts	Login, current user aur token/session related backend requests.
authenticatedRequest.ts	401 aane par session refresh karke API request dobara try karti hai.
clientDocuments.ts	Backend se client documents fetch karti hai.
clientMeeting.ts	Client meetings ki backend requests.
clientWorkFollow.ts	Client work-follow queue mangati hai. SM task screen ise call nahi karti.
crmAssignment.ts	CRM assignment, client registration aur document-upload requests.
lead.ts	Lead create/assign aur lead-related backend operations.
leadSearch.ts	Backend se leads search/load karne ki API.
meeting.ts	Meeting scheduling, history, updates aur verification API requests.

src/components

File / folder	Purpose
AuthButton.tsx	Login/auth forms ka reusable button.
AuthInput.tsx	Login/auth forms ka reusable input.
BackgroundCurves.tsx	Background ke decorative shapes aur curves.
Checkbox.tsx	Reusable checkbox UI.
ClientMeetingScheduleForm.tsx	Client meeting schedule karne ka form.
ComingSoon.tsx	Abhi available nahi hone wale features ka placeholder.
FormAlert.tsx	Form ke error, success aur information alerts.
LegalPage.tsx	Terms, privacy aur related information pages ka layout.
Logo.tsx	App logo display karti hai.
PasswordInput.tsx	Password input aur show/hide action.
PwaInstallPrompt.native.tsx	Native app mein browser-install prompt nahi dikhata.
PwaInstallPrompt.tsx	Install-prompt component ka default export connection.
PwaInstallPrompt.web.tsx	Browser mein app install karne ka prompt.
ValidationMessage.tsx	Input ke neeche validation message.
VerificationDropdown.tsx	Verification forms ka reusable dropdown.

src/components/superAdminDashboard

File / folder	Purpose
additionalPerformanceHelpers.ts	Additional performance totals, breakdown aur table configuration.
AdditionalPerformanceSection.tsx	Additional team-performance table ka UI.
AnalyticsCard.tsx	Dashboard analytics ka card.
currentWeekPerformanceHelpers.ts	Current-week table widths, layout aur summary calculations.
CurrentWeekPerformanceSection.tsx	Current-week team performance ka UI.
DashboardStates.tsx	Dashboard ke loading skeleton, empty aur error states.
FilterBar.tsx	Dashboard filters ka UI.
InsightCard.tsx	Dashboard insights/highlights ka card.

src/constants

File / folder	Purpose
shellColors.ts	App shell/navigation ke fixed colors.
spacing.ts	Common small, medium aur large spacing values.
typography.ts	Common font aur text settings.

src/context

File / folder	Purpose
AuthContext.tsx	Components ko authentication state access karne ka interface.
AuthProvider.tsx	App tree mein authentication context provide karti hai.

src/data

File / folder	Purpose
contact.ts	Contact information ka static content.
help.ts	Help sections ka content.
privacyPolicy.ts	Privacy policy ka content.
terms.ts	Terms and conditions ka content.

src/layout

File / folder	Purpose
AppShell.tsx	Sidebar, top navigation aur main content ka outer layout.
ContentContainer.tsx	Main content ki width, padding aur positioning.
ModuleMenu.tsx	Modules choose karne ka menu.
NavigationTabs.tsx	Navigation tabs ka UI.
navigationTypes.ts	Modules aur tabs ke TypeScript structures.
Sidebar.tsx	Left-side navigation menu.
TopNavigation.tsx	Top navigation/header ka UI.

src/modules/leads

File / folder	Purpose
LeadComponents.tsx	Lead table, stats, filters aur badges jaise UI pieces.
leadData.ts	Lead-list types aur sample/static rows.
LeadScreen.tsx	Leads listing ki main screen.

src/modules/leads/details

File / folder	Purpose
LeadDetailsComponents.tsx	Lead information, timeline, notes aur document cards.
leadDetailsData.ts	Lead-details ke types aur sample data.
LeadDetailsScreen.tsx	Lead details page.

src/modules/leads/followup

File / folder	Purpose
FollowupScreen.tsx	Follow-up add karne ka form aur related UI pieces.

src/modules/reports

File / folder	Purpose
ReportsScreen.tsx	Reports page ke filters aur preview assemble karti hai.

src/modules/reports/components

File / folder	Purpose
ReportFiltersSection.tsx	Report filters ka main section.
ReportSidebarFilters.tsx	Report sidebar ke filters.

src/modules/reports/constants

File / folder	Purpose
reportFilterOptions.ts	Report periods, filter options aur default date ranges.

src/modules/reports/hooks

File / folder	Purpose
useDropdown.ts	Report dropdown ka open/close aur anchor state.
useReportDatePicker.ts	Report date selection aur range formatting.

src/modules/reports/mock

File / folder	Purpose
monthReport.ts	Monthly report ka sample data.
sixMonthReport.ts	Six-month report ka sample data.
yearReport.ts	Yearly report ka sample data.

src/modules/reports/reportPreview

File / folder	Purpose
ReportPreview.tsx	Report ke KPI cards, charts, leaderboard aur summaries.
reportPreviewResolver.ts	Selection ke hisaab se report-preview data choose karti hai.
types.ts	Report preview ke data structures.

src/modules/salesManager/dashboard/components

File / folder	Purpose
ConversionPerformanceSection.tsx	Conversion performance ka dashboard section.
DashboardListScreen.tsx	Selected dashboard list ki detailed screen.
DashboardListsSection.tsx	Dashboard par list-summary cards.
SalesActivityCard.tsx	Ek sales-activity metric/card.
SalesActivitySection.tsx	Sales-activity cards ka section.
TodayOverviewCard.tsx	Today overview ka individual metric/ranking card.
TodayOverviewSection.tsx	Today overview cards ko arrange karti hai.

src/modules/salesManager/dashboard/mock

File / folder	Purpose
conversionPerformanceData.ts	Conversion section ka sample data.
dashboardListsData.ts	Dashboard lists ka sample/configuration data.
salesActivityData.ts	Sales activity ka sample data.
todayOverviewData.ts	Today overview ka sample data.

src/modules/salesManager/dashboard/types

File / folder	Purpose
dashboard.ts	SM dashboard cards, metrics aur lists ke data types.

src/modules/salesManager/forms

File / folder	Purpose
LeadWorkflowForm.jsx	Lead/meeting update form, inputs aur related actions.

src/modules/salesManager/tasks

File / folder	Purpose
SalesManagerLeadDetailScreen.tsx	Selected prospect/task ki detailed information.
SalesManagerTasksScreen.tsx	Search, filters aur task cards ko screen par arrange karti hai.
salesManagerTasksStyles.ts	Task screen ki spacing, colors, sizes aur layout.
taskConstants.ts	Fixed options, labels aur service-request URL.
taskDateUtils.ts	Dates format karna aur Today/Pending/Future dates check karna.
taskFilters.ts	Search/filters se visible tasks aur counts nikaalti hai.
taskMappers.ts	Backend data ko task-card format mein badalti hai. Client mapper SM hook mein use nahi hota.
taskMeetingSelectors.ts	Actionable meetings aur unka schedule decide karti hai.

src/modules/salesManager/tasks/__tests__

File / folder	Purpose
smTaskLoading.test.cjs	Check karti hai ki SM load/refresh mein client APIs call na hon.
taskCard.test.cjs	Card actions, nested-button fix aur disabled Update Meeting ke checks.
taskLogic.test.cjs	Dates, search, filters, counts aur mapping ke regression checks.

src/modules/salesManager/tasks/components

File / folder	Purpose
FilterDropdown.tsx	Task filters ka reusable dropdown UI.
SalesTaskCard.tsx	Individual task card: name, remarks, dates aur actions.

src/modules/salesManager/tasks/hooks

File / folder	Purpose
useSalesManagerTasks.ts	Prospects/meetings load, refresh, state aur filters connect karti hai. Client APIs call nahi hoti.

src/modules/salesManager/tasks/mock

File / folder	Purpose
taskFilterOptions.ts	Task-type/stage options. Mock folder mein hai, lekin filter constants rakhti hai.

src/modules/salesManager/tasks/types

File / folder	Purpose
screen.ts	SM task screen ke props/callbacks ka TypeScript structure.
tasks.ts	Task fields ka structure: ID, name, schedule aur meeting details.

src/modules/teamMapping

File / folder	Purpose
TeamMappingCard.tsx	Leader, team leader aur sales manager cards.
teamMappingData.ts	Mapping ke data types aur sample hierarchy.
TeamMappingLayout.tsx	Mapping page ke columns, header aur layout pieces.
TeamMappingScreen.tsx	Team hierarchy/mapping ki main screen.

src/modules/usersRoles

File / folder	Purpose
UsersRolesComponents.tsx	Reusable stats, filters, badges aur table-related pieces.
usersRolesData.ts	User/role rows ke types aur sample data.
UsersRolesLayout.tsx	Page header, controls, table shell aur pagination layout.
UsersRolesScreen.tsx	Users/roles page ki main screen.
UsersRolesTable.tsx	Users/roles table ka UI.

src/navigation

File / folder	Purpose
navigationConfig.ts	Role ke hisaab se available navigation items decide karti hai.
roleExperience.ts	User role ko frontend experience/workspace se map karti hai.
shellConfig.ts	Experience ke hisaab se top tabs aur module options deti hai.

src/screens

File / folder	Purpose
AssignedLeadsScreen.tsx	Assigned leads ki screen.
ClientWorkFollowScreen.tsx	Client work-follow queue aur related actions ki screen.
CrmOnboardingScreen.tsx	CRM client onboarding, registration aur assignment workflow.
DashboardScreen.tsx	User experience ke hisaab se dashboard sections assemble karti hai.
meetingVerificationForm.ts	Meeting data se verification form ki initial values banati hai.
SalesCoordinatorScreen.tsx	Coordinator tabs, state, refresh, verification-submit aur assignment flow connect karti hai.
salesCoordinatorStyles.ts	Coordinator screen, history aur verification popup styles.

src/screens/auth

File / folder	Purpose
LoginScreen.tsx	Screen size ke hisaab se login layout choose karti hai.
SplashScreen.tsx	App khulte waqt initial animated screen.

src/screens/auth/login

File / folder	Purpose
DesktopLogin.tsx	Desktop login layout.
LoginFormSections.tsx	Login/create-account form ke sections.
LoginShared.tsx	Login layouts ke shared cards, styles aur prop types.
MobileLogin.tsx	Mobile login layout.
TabletLogin.tsx	Tablet login layout.

src/screens/dashboard

File / folder	Purpose
additionalPerformanceData.ts	Secondary/additional performance groups ka data.
dashboardData.ts	Dashboard data exports ko ek jagah available karati hai.
dashboardTypes.ts	Dashboard metrics, tables, leaderboard aur dates ke types.
leaderboardData.ts	Leaderboard aur period-wise summary data.
performanceData.ts	Performance table ke rows aur columns.
teamPerformanceData.ts	Team performance groups ka data.
useDashboardDatePicker.ts	Dashboard date-picker aur selected range state.

src/screens/salesCoordinator

File / folder	Purpose
coordinatorConstants.ts	Fixed dropdown options, labels, team mapping aur settings.
coordinatorData.ts	Backend se coordinator leads aur client meetings load/prepare karti hai.
coordinatorExport.ts	CSV export, filename formatting aur value escaping.
coordinatorFilters.ts	Meeting filters aur assigned-lead card ka color group.
coordinatorForms.ts	Forms ki initial values aur investment calculations.
coordinatorTypes.ts	Coordinator forms, tabs aur filters ke data structures.
coordinatorUtils.ts	Date/time formatting, mobile masking, roles aur validation helpers.
verifiedMeetingStorage.ts	Verified client meetings locally save/load aur merge karti hai.

src/screens/salesCoordinator/__tests__

File / folder	Purpose
coordinatorLogic.test.cjs	Filters, forms, storage, pagination aur export ke 8 regression tests.

src/screens/salesCoordinator/components

File / folder	Purpose
AssignedLeads.tsx	Lead assignment form, assigned-lead filters aur cards.
CoordinatorCalendars.tsx	Calendar aur date-picker UI.
CoordinatorControls.tsx	Refresh countdown, pagination, metrics, loading aur common buttons.
LeadHistory.tsx	Lead history, meeting timeline aur location action.
MeetingDetails.tsx	Meeting details aur verified coordinator responses.
MeetingTable.tsx	Meeting table, column filters aur meeting rows.
VerificationForms.tsx	Lead/client verification forms aur verification popup.

src/services

File / folder	Purpose
AuthService.ts	Login state, session refresh aur logout manage karti hai.
ClientCreatedService.ts	Converted/already-client leads ka shared data/state.
ClientDocumentService.ts	Client document download ka process.
LeadSearchService.ts	Loaded/search ki hui leads ka shared state.
LeadService.ts	Lead creation aur related state/events manage karti hai.
MeetingService.ts	Meetings ka shared state, verification data aur updates.
SecureStorageService.ts	Tokens, saved user aur session values store/read karti hai.

src/theme

File / folder	Purpose
colors.ts	App ki common color palette.
theme.ts	Colors, spacing, typography, radius aur shadows ko jodti hai.
ThemeProvider.tsx	Light/dark theme ka state aur access provide karti hai.

src/types

File / folder	Purpose
auth.ts	Roles, permissions, login, user aur token data structures.
crm.ts	CRM clients, registration, assignments aur documents ke structures.
lead.ts	Leads, statuses, requests aur responses ke structures.
meeting.ts	Meetings, schedules, verification aur API response structures.

src/utils

File / folder	Purpose
authValidation.ts	Login, email aur password fields validate karti hai.
meetingWorkflow.ts	Form values ko meeting-workflow request format mein badalti hai.
parsePastedDate.ts	Paste ki hui date ko parse karti hai.
prospectDetails.ts	Prospect details aur meeting-time information prepare karti hai.

Project root

File / folder	Purpose
App.tsx	App ka main connection point: session, screens aur navigation.
index.ts	Expo mein app ka root component register karti hai.
app.json	Expo configuration: app name, icons aur platform settings.
package.json	Dependencies aur start/build commands.
package-lock.json	Installed dependencies ke exact versions lock karti hai.
tsconfig.json	TypeScript checking/compiler settings.
PreviewMap.native.jsx	Android/iOS ke liye actual native map export karti hai.
PreviewMap.web.jsx	Web par native map ki jagah fallback preview.
.gitignore	Git mein kaunsi files/folders track nahi karne hain.
README.md	Project documentation.
AGENTS.md	Coding agents ke liye repository instructions.
CLAUDE.md	Claude coding assistant ke liye project instructions.
MEETING_SWAGGER_CHANGE_AUDIT.md	Meeting API/Swagger changes ka audit document.
debug.log	Debugging output ki log file.
package.zip	ZIP archive; running app ki source file nahi hai.

Main folders - quick meaning

File / folder	Purpose
.git	Git history aur metadata.
.github	GitHub workflows/configuration.
.expo	Expo local settings/cache.
.claude	Claude configuration.
android	Native Android project.
assets	Images, icons aur media.
dist	Generated web/build output.
node_modules	Installed third-party libraries.
public	Web static public files.
src	Main app source code.
